Milling (NPMS)

NPMS has the capability of manufacturing to meet the specific requirements of our customers. We operate 7 mills with plans for further expansion. NPMS is capable of milling whole material into powders ranging from 10mesh to 100 mesh, fine cuts, tea cuts and cut and sifts and re-cleaning materials.

Individual production rooms eliminate cross contamination. In addition we also utilize magnets, separators, sifting boxes and metal detectors when needed to ensure the quality of your products. Operating 24 hours a day, NPMS offers the quickest turnaround time possible. With a combined 200 years of milling experience and product knowledge within the food and nutritional industries. The staff at NPMS offers exceptional quality and service.

Sterilization (NPSS)

NPSS offers steam sterilization for a wide variety of products.

Our two in-house dry steam sterilizations chambers utilize state-of-the-art technology which facilitates rapid penetration of dry steam and transfers heat throughout the materials being sterilized. This unique system enables us to control the temperature, pressure and duration of the steam process to meet the unique requirements of the products being treated. The result is a natural, highly effective, validated sterilization process.

Blending

Utilizing stainless steel ribbon blenders, BDS Natural Products has the ability to blend up to 5,000 lbs per batch and can produce 50,000 lbs plus per day. Our experienced staff provides uniform, thorough blending to ensure high quality finished products.

Product expertise consists of seasoning blends, functional powder blends, herbal tea blends, instant beverages and nutritional blends. Our R&D team is available to assist with your unique formulations.

Roasting

Service is offered to customers who want to enhance the flavor of their ingredients by roasting their raw materials.

R&D Service

We offer an array of specific services tailored to meet our customer's needs and requirements. Based in Long Beach California, BDS Natural Products has one of the largest manufacturing facilities in the United States.

Utilizing state-of-the-art equipment, we are able to offer custom milling, blending and steam sterilization and roasting services that meet the needs of the food, nutraceutical and tea industries.

Our product expertise includes botanicals, herbal teas, spices, seasoning blends and nutritional formulations. We offer everything from raw materials to finished bulk products, including certified organic processing (Oregon Tilth).

All products come with a complete certificate of analysis and we can produce to meet your finished specifications.

Our R&D department can offer custom formulations, seasoning blends, nutritional blends, instant beverages and tea blends
